

# The Pentacam: The Next Wave in Comprehensive Eye Scanner Technology

Please join us for the newest software updates, including Phakic IOL Simulation.

**Saturday, April 28, 2007**

**Omni Hotel • Salon B • San Diego, California**

**6:00 - 6:15 AM Registration and Breakfast**

**6:15 - 7:30 AM Educational Program**

Please join Oculus, Inc., and *Cataract & Refractive Surgery Today* for an informative breakfast symposium on the diagnostic capabilities of the Pentacam. Learn how this pioneering instrument provides more accurate K readings for postrefractive surgery cataract patients, precise front and back topography maps, keratoconus detection, and lens densitometry—all in less than 2 seconds.

Several experienced ophthalmologists will share the clinical results they have obtained with this innovative imaging device. Get their advice on how to smoothly integrate the Pentacam into your practice.

Don't miss out on a special discount on the system when you place an order at the San Diego meeting.

## Invited Faculty:

**Michael W. Belin, MD - Moderator**  
New Keratoconus Protection Program for Enhanced Refractive Surgery Screening

**Warren E. Hill, MD**  
IOL Power Calculations for the Post-Keratorefractive Eye

**Iqbal Ike K. Ahmed, MD**  
Pentacam From a Cataract Surgeon's View

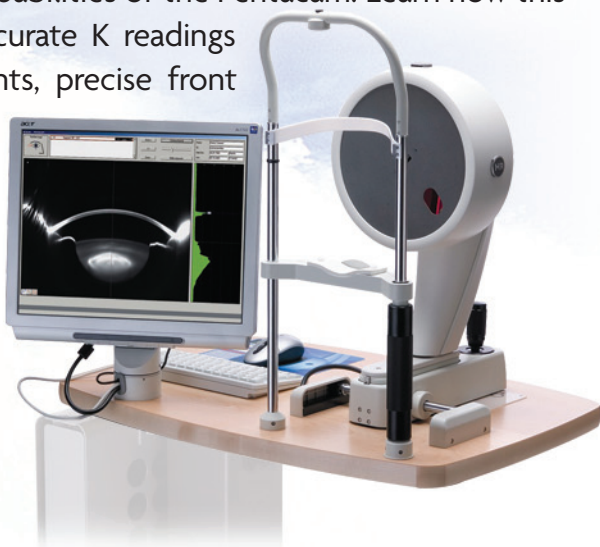

**Steven C. Schallhorn, MD**  
The Added Value of the Pentacam in a Refractive Practice

**H. Burkhard Dick, MD**  
Planning Phakic IOL Implantation Using the New Pentacam HR Software Module

**John A. Vukich, MD**  
Pentacam Analysis of Corneal Aberration: A Simplified Method to Customize Aspheric IOL Selection
